# Connect ONE® · UNIFIED™ INTELLIGENCE

Multiple Sites & Systems in ONE Unified Interface

No software to maintain | Always up-to-date

Security, Fire & Video

- Conveniently view, control & manage all locations from anywhere
- Arm & disarm, easily add and delete system user codes
- Event notifications sent via email/text/push or on-screen pop-up alerts
- View multiple cameras from all locations on the same screen
- Video verification to link alarm, access and other events to cameras
- At-a-glance GeoView system mapping shows status and controlling functions using your floor plans
- Monitor full-data from commercial fire alarm systems
- Mobile Wallet Cards

Access Control

- Manage multiple locations with ease by only having to enter user data once
- Create & manage access users, schedules & permissions
- Easily lock & unlock doors
- Lockdown features with custom notifications
- Generate activity reports
- Create customized reports
- Safe Passage, keeps employees & visitors safe regarding health and/or hazard concerns.
- Compatible with pin codes, cards, fobs, and mobile credentials
- Emergency Response Platform for first responders to view cameras, unlock doors, initiate lockdown, and view recent activity.

Facility Automation

- Maximize energy savings by setting HVAC systems to follow security status
- Avoid expensive product & property damage with critical temperature, humidity and CO_2 monitoring
- Facility repair, incident, & event-response tracking
- Asset Management; keep track of keys, equipment, tools, inventory, electronics & badges
- Integration with Microsoft Teams and Mass Notification Systems for critical notifications
- API for integration with External Business or HR Software
- Monitor current weather conditions for alerting, reporting, and interaction with other systems

Building Security Management Cloud Platform
